

Overview

Palletiser Systems

FLG
AUTOMATION

- ✓ Shortest cycle rates
- ✓ Highest reliability
- ✓ Short duration of ROI
- ✓ Easy to use
- ✓ Plug'n play
- ✓ Stand-alone systems
- ✓ Tray design included
- ✓ Ideal for medical, pharmaceutical, automotive, electronic and consumer good products

Palletizing

The products

With our palletizers you get fully automatic systems for palletizing from your production derived products, or provision of small parts for subsequent assembly lines.

The handling

Flexible design options, with regard to handling/ grab technology, work-piece carrier and transfer height, ensure an optimal adaptation to your production.

The charge carriers

As a carrier for a gentle material and orderly, internal logistics, as well as for shipping, we palletize or we depalletize „in/out“ plastic trays, blisters, KLT-boxes etc.

The pallets provision

Due to the automatic feeding of the work-piece carrier pallets can be reached uninterrupted and safe production for several hours. The feeding can also be done to save space on dollies.

Whether glass body, plastic parts ...

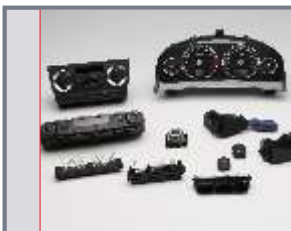

Multiple suction systems for cross cleanroom application

Plastic thermoforming trays for plastic moldings

Automatic feeding/ discharging of pallets by double belt- or roller conveyor

... electric motors, tooth-brushes, etc. We have a solution for everything!

8-times gripper system for trayloading with tooth-brushes heads

Double gripper system for KLT-boxes palletizing

Manual feeding/ discharging over dollies
